Bandung

A Frontend & Fullstack Software Engineer focused on developing interactive, scalable, and responsive web applications. Proficient in the JavaScript/TypeScript (React.js, Next.js, Node.js) and PHP (Laravel) ecosystems, building end-to-end architectures—ranging from precise UI design to REST API integration, database management, and real-time features. Possesses strong problem-solving skills and a commitment to writing clean code; ready to contribute within a dynamic team environment.

Work experience

PT. Inovasi Tjaraka Buana - Bandung <i>Frontend Developer</i> - Developed a responsive web dashboard for real-time CCTV monitoring using React.js and Tailwind CSS. - Integrated Dahua REST APIs to manage live stream data, playback, and device status, while optimizing interface load times. - Leveraged AI tools to accelerate visual component creation, logic implementation, and technical troubleshooting. - Collaborated actively with the DevOps team and field technicians to ensure seamless synchronization between API data and hardware.
